

Payroll Tax Changes for January 1, 2018!

The following settings are based on the CRA document T4127- Payroll Deductions Formulas for Computer Programs—107th Edition.

Effective January 1, 2018, changes must be made to your payrolls. Please remember that deduction code changes **MUST** be made to each one of your payrolls separately. Do **NOT** implement deduction changes (EI and CPP) until you are ready to run a January pay period per payroll.

The Global Federal and Provincial exemptions, tax tables and tax parameters will only need to be added once for all payrolls. You would add the new exemptions and tax tables using a new effective date of January 2018 or 201801. The new Global tables can be added at any time as those tables are date effective.
